## **VIII ECPD INTERNATIONAL SUMMER SCHOOL ON CARDIOVASCULAR DISEASES**

**WITH THE MAIN TOPIC**

# **RISK FACTOR CONTROL, DIAGNOSTICS AND TREATMENT OF CARDIOVASCULAR DISEASES**

**(Miločer, July 4–8, 2016)**

It is our pleasure to invite you to participate in the VIII ECPD International Summer School of Cardiovascular Disease (hereinafter referred to as: School).

The European Center for Peace and Development University for Peace established by the United Nations (ECPD) traditionally organizes this Summer School with the aim to advance the knowledge of primary care providers, specialists in cardiology and other specialties in the latest tech-

nological and research developments, and guidelines for prevention and treatment of cardiovascular diseases. The five-day program will focus on the latest research, technological advances and case study review as well as discussion on the guidelines and latest treatment options regarding the prevention, early detection and management of cardiovascular diseases. The School is intended for primary care doctors and specialists (cardiologists, endocrinologists, internists, pediatricians, etc.).

**President** of the School Council is **Academician Prof. Dr. Vladimir Kanjuh**, SANU, Belgrade, **Director** of the School is **Prof. Dr. Nathan Wong**, University of California, Irvine, USA, and **Co-Directors** of the School are **Prof. Dr. Ian Graham**, Trinity College, Ireland, **Academician Prof. Dr. Miodrag Ostojić**, SANU, Belgrade, and **Academician Prof. Dr. Duško Vulić**, School of Medicine, University of Banja Luka.

**The School is accredited by the European Board for Accreditation in Cardiology (EBAC) with 23 CME credits for the participants.**

Despite the guidelines for the treatment of acute coronary syndromes, heart failure, atrial fibrillation, and prevention of cardiovascular diseases, many patients, especially in the South-East European region remain inadequately treated for risk factors, acute coronary syndromes, heart failure, or atrial fibrillation and adherence to treatments is not optimal. Recent surveys from EUROASPIRE III and EUROASPIRE IV show that many patients with pre-existing coronary artery disease are not on the recommended therapies and treatment patterns vary considerably between regions, even within a limited geographic region such as the South-East European region. Data often show that while treatment of individual risk factors may be adequate, combined treatment and goal attainment of multiple risk factors, such as LDL-C, blood pressure and A1c levels together in those with diabetes is often insufficient, requiring implementation of systemic efforts addressed to all required risk factors both in primary and in secondary prevention.

## PROGRAM

The **Program** of this year's School will cover the following topics:

- **Basics of cardio epidemiology, risk factors and preventive cardiology. Guidelines**
